AMENDMENTS to the CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (currently amended) A computer-implemented method for transferring content from one computer resource to another computer resource, comprising the steps of:

receiving a user command to enable automatic cutting-and-pasting in a destination first, source second sequence, with user enablement of automatic natural language translation;

subsequent to receiving said command and enablement, receiving a user selection of one or more insertion points in the contents of a destination computer resource via a destination user interface, said computer resource consisting of an electronic document;

subsequent to receiving said user-selected insertion points, receiving a user selection of one or more information elements via a source user interface;

intercepting transfer of said information elements to said destination computer resource;

determining which intercepted information elements are expressed in a natural language not matching a user-specified natural language;

responsive to finding no existing natural language handling rule for an information element to be transferred:

invoking a rule management user interface; and

allowing via said rule management user interface a user to define an action to be taken selected from the list of invoking a natural language translation process, allowing transfer without modification, and isolating said information element, thereby blocking [[their]] transfer of said intercepted information elements to said destination computer resource;

performing one or more natural language handling actions on said intercepted information [[said]] elements which do not match said user specified natural language as defined by one or more natural language handling rules; and

transferring [[any]] information elements to said destination which have been translated to said user specified natural language as a result of said handling actions.

2. (original) The method as set forth in Claim 1 wherein said handling actions comprise isolating certain information elements according to said handling rules, thereby blocking their transfer to said destination.

3. (original) The method as set forth in Claim 1 wherein said handling actions comprise determining an original natural language in which each intercepted information elements is expressed, and subsequently invoking a computer translation process to translate each item from said original natural language to said user-specified natural language.

Claims 4 - 14. (cancelled)
